TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective

The investment objective of the Fund is to track the equity market performance of the Reference Index (as defined below) less fees and expenses. Further information on the Reference Index is set out below under the heading "General Description of the Reference Index").

Investment Policy

The investment policy of the Fund is to seek to track the performance of the Solactive GBS China ex A-Shares Large & Mid Cap USD Index NTR (or any other index determined by the Directors from time to time to track substantially the same market as the Solactive GBS China ex A-Shares Large & Mid Cap USD Index NTR and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Reference Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Reference Index. Any determination by the Directors that the Fund should track another index, and that change is considered to result in a material amendment to the investment policy and exposure of the Fund, shall be subject to the prior approval of Shareholders, the index complying with the index eligibility requirements under the Regulations and will be implemented in accordance with the Central Bank Rules and this Supplement shall be updated accordingly. In the event that a change of index is considered to be a non-material amendment to the investment policy and exposure of the Fund, Shareholders will be provided with advance notice before the change of index is implemented. At all times, the Directors shall ensure that the index complies with the index eligibility requirements under the Regulations and will be implemented in accordance with the Central Bank Rules and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Reference Index and the return of the Fund, after fees and expenses. For information in relation to the difficulties associated with tracking indices, please refer to the "Risk Factors" section below.

In order to achieve the investment objective, the Company on behalf of the Fund intends to replicate the Reference Index as set out at (a) below; or invest in securities similar in nature to the components of the Reference Index set out at (b) below. The Investment Manager having due regard to the best interests of the Fund and to prevailing market conditions and in accordance with the conditions set out below will determine which Investment Policy to follow at any given time and shall invest all or substantially all of the net proceeds of any issue of Shares in the manner further detailed below:

- a) equity and equity related securities are components of the Reference Index, such as, common and preferable stocks, securities convertible into common stock in order to replicate as closely as possible the performance of the Reference Index. The Fund may invest up to 20% of its Net Asset Value in such equity and equity related securities issued by the same body in order to replicate the Reference Index. The limit may be raised to 35% for a single issuer where exceptional market conditions apply or due to an increased allocation of an issuer within the Reference Index. These exceptional market conditions include where a single company may, for various reasons, including as a result of a merger, have a very dominant position. This increased limit may only be utilised where the Fund is investing directly in components of the Reference Index and is following the policy detailed in this paragraph (a); and
- b) Where the securities detailed at (a) above are unavailable, the Fund may invest in equity and equity related securities which shall relate to or are similar in nature to the

components of the Reference Index such as, common and preferable stocks, securities convertible into common stock, in order to deliver as closely as possible the performance of the Reference Index. Consequently, the prime criterion for selecting the individual equity and equity related securities is not their perceived attractiveness or potential growth or value but rather their suitability in terms of attaining the investment objective of delivering the performance of the Reference Index.

The Fund may hold small amounts of cash and ancillary assets (which will normally have dividend entitlements of income receivables) subject to the limits set out in the Prospectus.

The assets listed at (a) and (b) above, any ancillary cash and any instruments held by the Fund (either for investment or efficient portfolio management purposes) shall constitute the "**Fund Assets**" for the purposes of the Prospectus. All instruments shall be listed and/or traded on the exchanges and markets set out in Appendix II of the Prospectus. Due to the nature of the Fund's investments as detailed above the Fund is likely to be subject to high volatility levels.

The Fund may, with due regard to the best interest of its Shareholders, decide from time to time to switch partially or totally from one of the above described policies to the other. The decision to switch between policies will be determined by the Investment Manager depending upon prevailing market conditions and will only occur where components of the Reference Index are unavailable.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund will invest on a long-only basis.

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "**Investment Objectives and Policies**" and under "**Investment Restrictions**".

Index Tracking Strategy

In normal market conditions the Fund can be expected to match the performance of the Reference Index (less the Management Fee and associated costs which include securities lending arrangements and/or Repurchase Transactions (as detailed below)) and any annualised tracking error to the Reference Index is not expected to exceed 0.90% in normal market conditions

Portfolio Transparency Policy

The securities in which the Fund will invest in order to achieve its investment objective are set out in the "Investment Policy" section above. Details on the composition of the portfolio are set out on the Website.

Securities Financing Transactions

The Company may (for the purposes of efficient portfolio management only) enter into Securities Financing Transactions with financial institutions with a minimum credit rating as permitted by the Regulations, or which are deemed by the Fund to have an implied credit rating at least equal to such level (a "**Counterparty**"). Any such Securities Financing Transaction will be subject to the conditions, limits and requirements of the Central Bank, SFTR and the provisions of the Prospectus. In these transactions, Collateral will move between the Company and the relevant Counterparty in order to mitigate any counterparty risk. The Company shall at all times have a right to recall any securities lent or terminate any such securities lending agreement into which the Company has entered into. In addition any and all revenues net of operating costs generated by efficient portfolio management activities will be returned to the Company.

Investors should also note the information contained in the "Securities Financing Transactions" and "Collateral Policy" sections in the main body of the Prospectus.

The maximum proportion of assets of the Fund which may be subject to such Securities Financing Transactions and Total Return Swaps at any given time is 100% of Net Asset Value. However it is expected that the actual proportion of assets of the Fund which will be subject to Securities Financing Transactions and Total Return Swaps is 0% of Net Asset Value.

In any case the most recent semi-annual and annual reports will express as an absolute amount and as a percentage of the Fund's assets the amount of Fund assets subject to Securities Financing Transactions and Total Return Swaps.

Risk Management Process

The Company on behalf of the Fund has filed with the Central Bank its risk management policy which enables it to accurately measure, monitor and manage the various risks associated with the use of FDIs. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments.

The Company will use the commitment approach for the purposes of calculating global exposure for the Fund and global exposure will be limited to 100% of NAV. The Fund aims to have 100% exposure to the Reference Index and will not have any additional incremental exposure or leveraged exposure to the Reference Index therefore the global exposure of the Fund is expected to be 0% (i.e. the total exposure of the Fund to the Reference Index will be limited to 100% of NAV).

Efficient Portfolio Management

The Company may also (for the purposes of efficient portfolio or cash management and not for investment purposes), invest in cash deposits, money market instruments, OTC options on the components of the Reference Index and units of UCITS regulated money market collective investment schemes.

Further information on efficient portfolio management is contained in the main body of the Prospectus under the heading "Efficient Portfolio Management".

Investors in particular must note that the general investment restrictions set out under "**Investment Restrictions**" in the Prospectus apply to the Fund. In addition the following investment restrictions shall apply to the Fund:

Leverage

The Fund will not be leveraged. The market risk of the Fund will be measured using the commitment approach in accordance with the requirements of the Central Bank. Any entry into repurchase agreements shall provide exposure on a 1:1 basis to the Fund Assets.

The Fund does not intend to pay dividends.

Limited Recourse

A Shareholder will solely be entitled to look to the Fund Assets in respect of all payments in respect of its Shares. GENERAL DESCRIPTION OF THE REFERENCE INDEX

The Reference Index is the Solactive GBS China ex A-Shares Large & Mid Cap USD Index NTR. The Reference Index is further described below but this information only represents an extract of the information available and neither the Directors, Solactive AG or such other successor sponsor to the Reference Index (the "**Index Provider**") nor the Investment Manager take any responsibility for the accuracy or completeness of such information.

The Reference Index seeks to track the performance of securities of large and midcap companies in the Chinese market. The Reference Index covers approximately 85% of the free-float market capitalization of the Chinese market excluding China A shares. It is calculated as a Net Total Return index in USD and weighted by free-float market capitalization. The Reference Index is adjusted semi-annually on the adjustment days, which are the first Wednesdays of May and November (the "**Adjustment Days**"). Additionally, IPOs can be included on a quarterly basis on the Adjustment Days (in May and November) or on the IPO adjustment days, which are the first Wednesdays of February and August (the "**IPO Adjustment Days**"). If the Adjustment Days or IPO Adjustment Days are not eligible trading days, adjustments will be made on the next eligible trading day.

Further details of the Reference Index composition and its calculation methodology can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Reference Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Provider and website

The Reference Index is sponsored by Solactive AG.

The methodology of the construction of the Reference Index is available on the Solactive AG website: <https://www.solactive.com/indices/>

Additional information about the Reference Index and the closing price of the Reference Index is available at: <https://www.solactive.com/indices/>

OTHER INFORMATION

Risk Factors

Certain risks relating to the Shares are set out under the heading “**Risk Factors**” in the Prospectus. In addition, Shareholders must also note that:

- (a) The sub-funds of the Company are segregated as a matter of Irish law and as such, in Ireland, the assets of one sub-fund will not be available to satisfy the liabilities of another sub-fund. However, it should be noted that the Company is a single legal entity which may operate or have assets held on its behalf or be subject to claims in other jurisdictions which may not necessarily recognise such segregation. There can be no guarantee that the courts of any jurisdiction outside Ireland will respect the limitations on liability as set out above.
- (b) Upon the occurrence of a Disruption Event or an Index Disruption and Adjustment Event (and without limitation to the Directors’ personal powers as further described in the Prospectus); (i) adjustments may be made to account for any such event (including adjustment to the Reference Index, the calculation of the Reference Index level and/or changes to the terms of the Derivative Contracts) which may have a significant impact on the Net Asset Value of the Fund; (ii) the Directors may temporarily suspend the calculation of the Net Asset Value and any subscription, redemption and exchange of Shares and payment of redemption proceeds in accordance with the provisions of the Prospectus under the section “Suspension of Calculation of Net Asset Value”; and/or (iii) the Directors may, in certain circumstances as set out in the Prospectus, terminate the Fund.
- (c) The value of investments and the income from them, and therefore the value of and income from the Shares can go down as well as up and an investor may not get back the amount invested. The Fund’s exposure is linked to the performance of the components of the Reference Index which, in turn, is exposed to general market movements (negative as well as positive).
- (d) The Fund’s use of the Reference Index is licensed by the Index Provider. If at any time, the licence is terminated or the Reference Index otherwise becomes unavailable, unreliable, inaccurate or unrepresentative, the Fund Directors may exercise their discretion to terminate the Fund in accordance with the terms of the Memorandum and Articles of Association.
- (e) The ability of the Fund to achieve significant correlation between the performance of the Fund and the Reference Index may be affected by changes in securities markets, changes in the composition of the Reference Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track the Reference Index returns regardless of the current or projected performance of the Reference Index or of securities comprising the Reference Index. As a result, the Fund’s performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Reference Index will affect the performance, volatility and risk of the Reference Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.
- (f) There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Reference Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Reference Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund’s tracking of the performance of the Reference Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the Reference Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Reference Index, or of market disruptions, rebalancing the Fund’s investment portfolio may not be possible and may result in deviations from the return of the Reference Index.

- (g) Some of the markets in which the Fund may effect derivative transactions are “over-the-counter” or “interdealer” markets, which may be illiquid and are sometimes subject to larger spreads than exchange-traded derivative transactions. The participants in such markets are typically not subject to credit evaluation and regulatory oversight, which would be the case with members of “exchange-based” markets. This exposes the Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a credit or liquidity problem with the counterparty. Delays in settlement may also result from disputes over the terms of the contract (whether or not bona fide) since such markets may lack the established rules and procedures for swift settlement of disputes among market participants found in “exchange-based” markets. These factors may cause the Fund to suffer a loss due to adverse market movements while replacement transactions are executed or otherwise.

Investors should also refer to the Prospectus for additional disclosure of risks.

References to Benchmarks

Indices may be referenced for various purposes including, but not limited to (i) operating as a reference benchmark which the Fund seeks to outperform; (ii) relative VaR measurement; and (iii) calculating performance fees. Where an index is used for the purposes of (i) above this will constitute use of an index within the meaning of Article 3(1)(7)(e) of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the “**Benchmark Regulation**”) where the Fund’s investment policy or strategy defines constraints on the asset allocation of the portfolio in relation to the index (e.g. an investment restriction that the Fund must invest only in components of the index or must be partially invested in line with index composition). Other references to indices, including for example for the purposes of relative VaR measurement as outlined at (ii) above, may not constitute use of an index within the meaning of Article 3(1)(7)(e) of the Benchmark Regulation. Shareholders should note that the ICAV and/or its distributors may from time to time refer to other indices in marketing literature or other communications purely for financial or risk comparison purposes. However, unless such indices are referred to as such in this Supplement they are not formal benchmarks against which the Fund is managed.

Where relevant, the Investment Manager shall put in place written plans, in accordance with Article 28(2) of the Benchmark Regulation, detailing the actions it will take in the event that any index it uses for the Fund in accordance with Article 3(1)(7)(e) of the Benchmark Regulation materially changes or ceases to be provided. These written plans shall detail the steps the Investment Manager will take to nominate a suitable alternative index.

Any index used by the Fund in accordance with Article 3(1)(7)(e) of the Benchmark Regulation shall be provided by an administrator either included in the register referred to in Article 36 of the Benchmark Regulation or availing of the transitional arrangements pursuant to Article 51 of the Benchmark Regulation.
